

Planting California Natives

Presented by Inland Empire Waterkeeper
Join Master Gardener and native plant specialist, Marianne Hugo as she guides you through best practices for establishing and maintaining native plants!

Join us at this free workshop, where you will learn:

- How to select the right California native plants for your garden
- How to create a pollinator habitat for our local birds, native bees, and butterflies.
- How California natives can help reduce your water use and bill!
- The magic of mulch! How mulch will transform your garden and reduce maintenance.
- How to install your plants in the ground and what soil is best.

SAT. 20th
JANUARY
10 AM - 12 PM

Those who register will receive free lunch!
